Vita STR History

Way back in the 1970s Vita Spa STR Series Swim Spa were launched in the USA at the very start of the hot tub industry. They were produced in Arizona by the MAAX Spas Industries Corporation by a team of people that are proud of their work. Many employees at MAAX Spas have been there for over 25 years so they know a thing or two about hot tubs.

Building a great spa takes a lot of experience and knowledge. To be able to offer a lifetime warranty on a hot tub, the insulation is no easy task and took many years to perfect these extremely important features but we did it.

You can be assured that buying a Vita STR Series Swim Spa is a sound investment into your family's future. It will provide you with years of enjoyment. We don't cut corners like other brands to offer cheap spas that are built on quality and reliability. You can truly relax when buying a swim spa from us.

Creating a luxury swim spa takes a lot of experience and knowledge. You can be assured that buying a Vita STR is a sound investment into your family's future and it will bring many happy years of enjoyment.

At Vita STR we stand by our quality and reliability, to ensure you continue to enjoy your swim spa for years to come.

Vita STR Advantages

Jet Propulsion System

The anti-turbulence technology of the xStream™ Force Jet Propulsion System creates a powerful, smooth, variable jet stream that is completely adjustable and designed to allow you to swim at your fitness level.

Smooth Jet Stream

The Vita STR Swim Spas Anti-turbulence technology provides a smoother, more even flow of water that can easily be adjusted to match your skill level. The unidirectional flow design eliminates harsh currents that can make it harder to stay in one place while you swim.

Wide Swimming Lane

The 30" swim lane in Vita STR swim spas gives you plenty of room for all forms of swimming, and even leaves enough space for people to sit on the observation bench without getting in the way of the swimmer. While you swim.

Training with xStream™ Force jets

Swimming has long been known as the ultimate zero-impact exercise and is widely prescribed by physicians for their patients who want to get in shape or tone their body. Your swim spa uses an impressive water propulsion system that works together with its open floor plan design. The observation seats and well-marked swim lanes provide the optimum swim training centre for your entire family.

Vita STR: Swim Train Renew

Swim

Swimming has long been known as the ultimate zero-impact exercise and is widely prescribed by physicians to patients who want to get in shape or tone their body. Vita STR swim spas employ two different water propulsion systems that work in concert with its open floor plan design.

Choose a multi jet deep stream for exercise or the MAAX Force™ swim system for the ultimate endless current swimming experience. The observation seats and well marked swim lanes provide the optimum swim training center for your entire family.

Train

A wide variety of aerobic exercises are possible in a Vita STR Swim Spa. Aqua jogging is especially effective as the deep water neutralizes the effects of gravity while increasing resistance for an amazing low impact workout. Fitness experts recommend a warm water fitness regimen to maximize weight loss. Your Vita STR can also be equipped with the aquatic exercise equipment package that features modern resistance band technology. Attach the resistance bands to perform a complete toning program.

Renew

When you are finished working out, sit back, and relax for a complete spa experience. Let the hydrotherapy jets massage those tight, sore muscles. A recent study shows even a 10 minute massage improves muscle recovery after working out. Combined with elements of luxurious space and sound capabilities, your swim spa helps you completely recuperate so you can face tomorrow at full capacity.

Vita Spa STR Series Features

Made in the USA

The hot tubs we see today were first created in the United States of America back in the 60s and that experience through the decades has enabled the US manufacturers to build the world's very best spas. Quality and innovation through past experiences.

Steel sub-structure

The steel structure design in Vita STR® series swim spas allows for complete service of the entire structure and all mechanical parts. The swim spa can be serviced and brought back to factory specifications right in your backyard. We call this feature "Appliance Grade."

The Vita STR® swim spas have a steel frame which provides greater structural integrity than wood, as well as superior corrosion protection for a much longer life. It will not expand or contract with moisture. The inorganic properties will never rot, warp, split or crack and eliminate worries of animal infestation or termite damage.

Lifetime steel structure warranty

Our steel structure carries a lifetime warranty. This means for the lifetime of your ownership you can feel secure knowing any component of the structural frame will be replaced or fixed to factory specifications.

- 40% lighter, yet 250% stronger than traditional wood frames
- Weatherproof
- Corrosion-free

Northern Exposure Insulation

Is a unique thermal barrier technology that recycles the free heat energy for more efficient heating. All four sides of the spa, plus the floor and cover, are lined with copper material to reflect radiant heat energy generated from the pumps back into the swim spa.

Service made easy

Your Vita STR® appliance grade swim spa can be serviced and put completely back together to factory specifications. This is not possible with conventional foam-filled swim spas as they are extremely hard to service and are typically damaged in the process.

Vita Spa STR Series Features

Lifetime Insulation Warranty

The insulation system in your new Vita STR swim spa is warranted to maintain the same insulation value as it had at the time it was manufactured. As you enjoy your swim spa over the years, you'll feel secure knowing it can be maintained at the same high level of efficiency as the day it was made.

Fully electronic 56 frame pump

Vita STR® swim spa utilize Direct Drive 56 frame pumps in all models. These are larger and more powerful than the 48 frame motors found in most swim spas. This eliminates mechanical switches, allowing the pumps to run longer and more energy efficient.

Powerpack with M8 technology

Powerpack with M8 Technology is a revolutionary new hardware software platform that completely eliminates mechanical sensor switches. The M8 platform features "Smart Sensors" to accurately and reliably measure water temperature.

Know your swim spa's health at a glance

The status indicator light is a standard feature on all swim spas, allowing you to check the status of your swim spa without opening the cover or app. The colour changes from blue to red or flashes blue or red with corresponding error codes.

The Vita STR swim spa filtration system

Our dual filtration system ensures that the maximum amount of water passes through the filters before it re-enters the spa. Filtration is driven by the powerful jet pumps, which rapidly circulate large amounts of water.

ABS sealed base

The ABS Sealed Base is made of one-piece construction and provides a rugged foundation that seals the bottom of the spa, locking in heat and sealing out moisture.

Vita Spa STR Series Features & Co

Weather shield cover

WeatherShield covers are lined with our copper insulation sheet to improve heat retention. Double stitched seams for durability allow the cover to hold over 400 pounds. The outer shell is extremely weather resistant to fading while weighing about 25% less than other covers in the industry.

CleanZone® Ultra

The use of the CleanZone® Ultra UVC light is the same technology utilized in many communities around the world to purify drinking water. This technology is combined with an Ozone System that is used to oxidize and clean your spa water.

This ultimate water purification system will automatically maintain healthy, crystal-clear water while reducing chemical maintenance. CleanZone® Ultra kills 99.9% of microorganisms, bacteria, viruses, and parasites, making this the perfect sanitization system for your spa.

Excel-X™ Cabinets

Made from a high impact composite, Excel-X looks and feels like real natural wood. Excel-X is ecologically friendly, doesn't weather or stain, and is virtually maintenance free.

STR Swim Spa Cabinet Choices

Modern Mocha

Pecan Ridge

Resort Grey

Acrylic Colour

Vita STR swim spas are finished in an attractive interior made from continuous cast acrylic. This is superior to ethylene "soft plastic" surfaces. The hard, non-porous surface resists stains, fading, scratches and chemical abuse. With the look of granite, pearl or metalescence, the extremely rugged and durable finish offers beauty and peace of mind.

Longevity and trust are very important in customers' thoughts when considering a hot tub purchase, and rest assured we offer both.

Vita Spa STR are proudly made in the U.S.A. by MAAX Corp, a company who have been manufacturing spas since 1977 and are one of the largest manufacturers in the world today. Vita Spa STR have been imported into the UK since 2003 and is now sold through a nationwide dealership network.

Having a dealership network provides local manufacturer trained engineers for delivery, servicing and after sales, which means we achieve a higher standard of customer care, something you can't guarantee from an internet purchase.

The benefit of local expertise is paramount in reassuring customers they will receive a fantastic service from start to finish. We build relationships with them to ensure a great experience enjoying their hot tub for years to come, again something you can't guarantee from an internet purchase.

To find your local authorised dealer visit www.vitaspa.co.uk
